

# Cookie policy for Oceana Hotels

## 1. What are cookies?

Cookies are small text files that are placed on your computer by websites that you visit. They are widely used in order to make websites work more efficiently as well as to provide information to the owners of the site.

Some examples of cookie usage are:

- Storing information to personalise the website to your requirements
- Cookies can be used to record users behaviour on a website, for example to record the pages they have viewed

There are two different types of cookie that can be placed in your browser by a website:

- Session cookies are only used for the period you use the website and are deleted when you close your web browser. A new cookie would then be placed in your web browser if you were to visit the same website again in the future.
- Persistent cookies remain in your browser once you have left the site and closed your web browser. The next time you visit the site the information in the cookie will be used to ensure the website works as set up at the previous visit, for example to display certain things on the homepage. Persistent cookies will expire if the website that set them is not visited again within a certain time.

## 2. Cookies on this website

We use a Google Analytics cookie on our website to record website usage. We do this to find out things such as the number of visitors to the various parts of the site. We collect this information in a way which does not identify anyone, we do not make any attempt to find out the identities of those visiting our website, and we do not share this information with anyone.

## 3. Managing cookies on your computer

Most web browsers allow some control of cookies through the browser settings. To find out more about cookies, including how to see what cookies have been set and how to manage or delete them, visit the [About Cookies](#) website.

You can choose to block the cookies that are set by this website, however you must be aware that doing so may mean that parts of the site will not work correctly.

There is more information on the [Information Commissioners](#) website.
